TOKENOMICS - OVERVIEW

PASSED: MEDIUM/HIGH RISK

An analysis of the holders shows that tokens are currently poorly distributed. The top 10 holders hold 89.42% of the liquidity of existing tokens.

We did an analysis of the project and spoke directly with the tokens owner who explained that wallets were never named on the blockchain but that they have specific tasks. Furthermore, we analysed the transactions of these wallets and none of them made us think that they were created with malicious intentions.

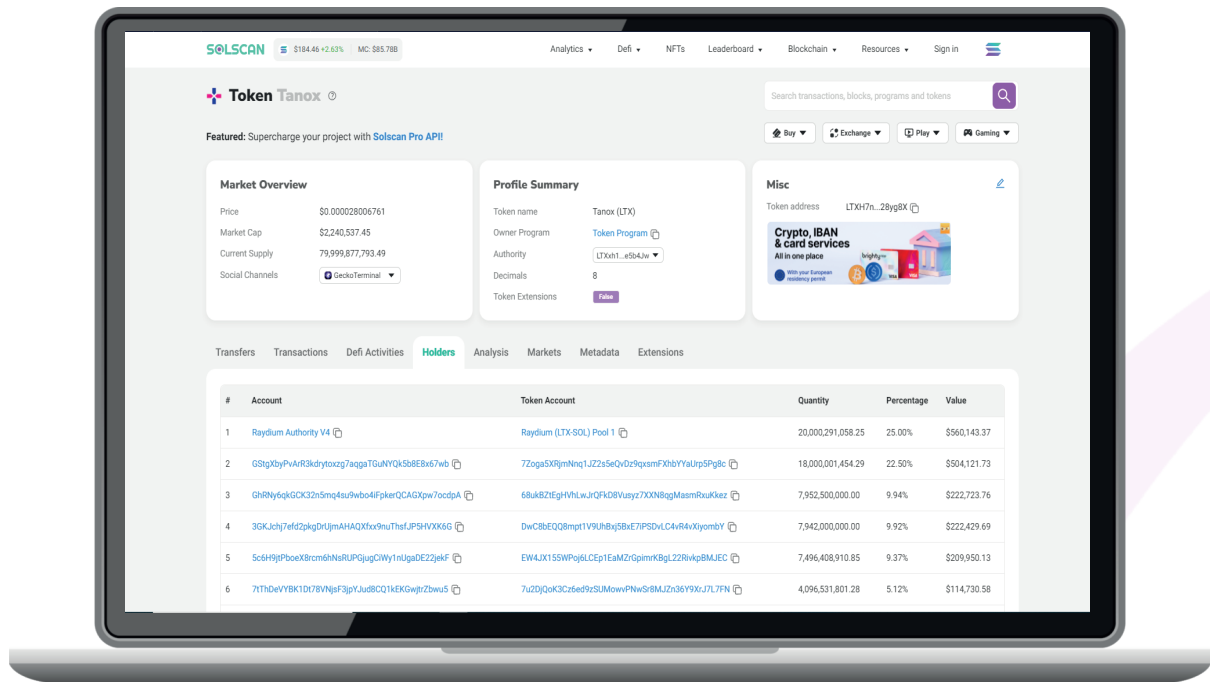

We report here on the wording and functionality of these wallets:

- GhRNy6qkGCK32n5mq4su9wbo4iFpkerQCAGXpw7ocdpA -> Development CEX listing
- GStgXbyPvArR3kdrytoxzg7aqgaTGuNYQk5b8E8x67wb -> Farm rewards Payout on Raydium
- 3GKJchj7efd2pkgDrUjmAHAQXfxx9nuThsfJP5HVXK6G -> Marketing & community incentive
- 5c6H9jtPboeX8rcm6hNsRUPGjugCiWy1nUgaDE22jekF -> contract wallet vesting founders

The founders' vesting is managed by the company <https://app.meanfi.com/>

With this paragraph we do not want to minimise the situation, which in itself is very risky for investors. We are merely reporting public data that the founders have no intention of hiding. It is up to each investor to investigate and make up his or her own mind.

CONTRACT CODE - PRIVILEGES

MINT

Owner can't mint new tokens

FEES

Owner can't change fees

TRADING

Owner can't change trading status

MAX TX

Owner can't change maxTx

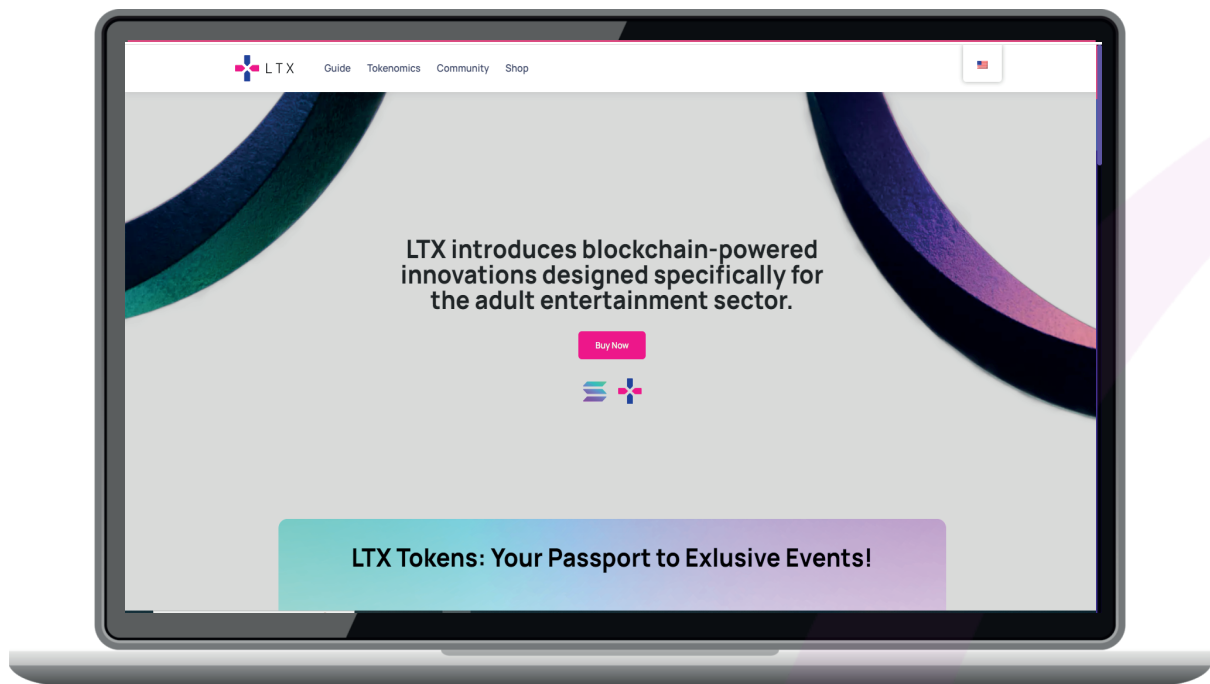

MAX WALLET

Owner can't change max wallet

BLACKLIST

Owner can't blacklist wallet

OWNER - PRIVILEGES

PASSED: LOW RISK

From the point of view of the owner's privileges, no serious irregularities are apparent. The owner can change the meta-data of the contract, but we have never considered this a serious risk for investors. Our opinion is positive.
